Introduction

Your Vedic Astrology Report consists of 4 sections: an interpretation of the Moon nakshatra and Moon sign, an analysis of yogas, a third section that describes various specific astrological influences in your chart, and an appendix of technical details. Fortunately, you do NOT need to be an astrologer or know what a "Moon nakshatra" is to read this report! If you are an astrologer or student of astrology, the astrological details are described as well, and you can easily skip over these technical astrological details if they do not interest you.

In this report there are quotations from the following books:

"Yogas In Astrology" by Dr. K S Charak, 1999, published by UMA Publications, 72 Gagan Vihat, Delhi-110 051, India

"Three Hundred Important Combinations" by B.V. Raman, 1997, published by Motilal Banarsidass Publishers Private Limited, Delhi, India

"Constellational Astrology" by Robert De Luce, 1963, De Luce Publishing Company, Los Angeles, CA, USA

If you are interested in learning Vedic astrology, we highly recommend these 3 books. Only small sections that are relevant to a particular astrological influence have been quoted from these books. These works are based on the ancient Vedic writings (the Vedas) and have been elaborated upon and explained in terms that make sense for modern people. "Constellational Astrology" is no longer in print, but the other two books can be purchased.

Important: The interpretations in this report are based on the ancient system of Vedic astrology. Many of these interpretations are fatalistic and some are even extreme, frightening, and are now known to be not literally correct! You should interpret the influences described here in more psychological and general terms. Do not take the statements given in this report literally! The extreme and definite interpretations in this report should be viewed as indicating

psychological tendencies rather than absolute facts. Also, modern astrologers believe that there is a negative and a positive potential in any astrological influence. Even the most difficult astrological influence can be handled successfully, and an astrological influence that might seem beneficial can be mishandled. Astrologers do claim to be able to describe the important issues and themes in your life, but what is good or bad is mostly up to you.

Section I: The Moons Nakshatras and Rasi

Nakshatras are also known as lunar mansions. There are 27 nakshatras, and each one has a length of 13 degrees and 20 minutes. The nakshatra position of the Moon is very important in Vedic astrology. Given below is the meaning of the Moon's nakshatra and Moon sign (rasi) in your chart.

Moon in 4th nakshatra:

The Moon is in Rohini, the fourth nakshatra (10 degrees to 23 deg 20 min of Taurus). Most likely you have a pleasing demeanor and disposition and are generally regarded as being truthful, pure, sweet-tempered, well-spoken, with a settled mind and lovely appearance.

Moon is in Taurus rasi:

According to De Luce: "The native will be of fine appearance, have a stately or sportive gait (fond of going astray), broad thighs (receptively sympathetic), and a large face (honorable); will have moles on his back, face and sides. Will be liberal in gifts, and endure hardships; will have great influence and run high as a wave (authority); will have a large hump on the neck (a thyroid condition?); will have daughters (be endowed with creativity in the arts); and have a phlegmatic temperament (calm, not easily aroused). Will be abandoned by his kinsmen and separated from his wealth and sons (creative accomplishments may not live after him). Will be liked by all, and of a patient nature. Will be a large eater (requires spiritual nourishment for creative work); fond of young women (enjoys that which is beautiful), and firm in his friendships (ideals); will be happy in the middle and concluding portions of life (will reap the benefits of what has been sown in youth)."

Section II: Yogas

You may be familiar with the word "yoga" as referring to various physical exercises and postures. APPENDIX

Vedic astrology is an ancient system of astrological analysis practiced by many thousands of astrologers over the centuries. Vedic astrology, like modern western astrology, has not been validated scientifically, and you should think critically about the information provided to see if it appears to be accurate and relevant. No astrological information should be blindly believed in. Astrology simply lacks the scientific proof that established sciences have. On the other hand, many people have found astrology to

be useful and helpful.
